

- (d) whether milk is collected and purchased from the Registered Dairy Societies or from the local milk mau;
- (e) the income and expenditure of the Dairy Farm per day;
- (f) the capacity of the creaming plant installed by the Dairy Farm?

SRI Y. RAMAKRISHNA (Minister for Law and Parliamentary Affairs and Veterinary and Animal Husbandary).—

- (a) There is a Government Dairy at Belgaum.
- (b) Milk collected from the producers is being standardised to 4.6 + 1% Fat and 8.5% S.N.F. and sold to consumers.
- (c) Daily average of Milk collected is 11,103 liters,
- (d) Milk is being collected both from the Milk Producers Co-operative Societies and individual producers.
- (e) Average income per day is Rs. 27,286.91. Average expenditure per day is Rs. 28,430.50 Expenditure is more than the revenue due to the following reasons.—

1. Cost of Dairy materials used daily has increased considerably.

2. Due to revision of pay scale and enchancement of D.A. from time to time the cost of establishment has increased.

3. The cost of transportation for procurement and distribution of milk has gone up considerably due to increase in the cost of petrol, diesel oil and other lubricants, spare parts etc.

(f) There are two Cream Separators installed at the Dairy with a capacity of 500 literes per hour per separator.
